

runtime\_error

```
classDiagram
    class runtime_error {
    }
    class mm_key_not_found_error["mm::key_not_found_error"] {
        +key_not_found_error()
        +key_not_found_error()
    }
    mm_key_not_found_error --|> runtime_error
```

The diagram illustrates an inheritance relationship. At the top is a class box for 'runtime\_error' with three empty compartments. Below it is a class box for 'mm::key\_not\_found\_error' with three compartments: the top for the class name, the middle for inheritance (shaded), and the bottom for methods. A red arrow points from the inheritance compartment of 'mm::key\_not\_found\_error' to the 'runtime\_error' class box.

mm::key\_not\_found\_error
